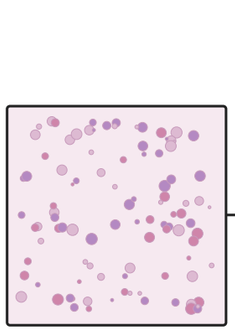
DCT v2.3



Whole slide image

Patch features UNI2-h

WSI projection

Slot Attention Prototype coordinates

WSI slots

P

Native WSI summary

Pair features + latent stages

Cost + budgets

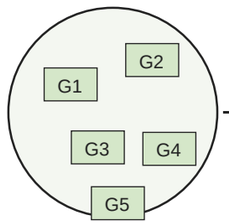
KL-relaxed UOT

T

Mass-gated transport risk readout

Native + transport fusion

Survival head



Paired omics

Pathway groups

Pathway encoders

Slot Attention Prototype coordinates

Omics slots

P

Native omics summary

WSI token

Pathway token

Slots

Training only

Raw gene inputs

Global gene mask

Masked view same encoders and UOT

Native

Learned T

Q diagnostic

Shared trunk + pathway gene heads

Masked gene reconstruction

Held-out values are targets only

Held-patient OOF gains

RNA + WSI mean Ridge teachers

Stage-cost calibration

Solid: model information flow

Dashed: supervision / audit

P: mean pooling
