DSS report values only. Inputs, patient splits and checkpoint selection differ; this is not a matched benchmark.

U1 = UNI; U2 = UNI2-h; g. = genomics; h. = histology. MOTCat [TTA] is a reproduction in TTA Table 1.

NR = no separate source cohort. CRC, KIPAN, LUNG and STES are not renamed to DCT cohorts.

Red bold = highest available report value; underline = second. LUSC has no comparator and is not ranked.

DCT: author five-fold best-validation summary. No Overall across different cohort sets. Full source means/SD: JSON.
