

DCT v3.13: transport-coupled prediction and pathway reconstruction

☐ Retained slot-encoding foundation

□ M1-M4: DCT modifications relative to SlotSPE

T Repeated badges = the same tensor

---▶ Training only

Training: survival NLL + IPCW rank + per-slot NLL + diversity + ramped self / cross reconstruction

Repeated S, T and g badges denote tensor reuse. SG = stop-gradient. Stages and tensors are learned / schematic, not annotated disease stages.
