Public DSS report values; inputs, splits and checkpoint selection differ. Ranks are descriptive, not matched results.

15 baseline rows: SlotSPE Table 1; all SlotSPE model rows excluded. Extra rows: TTA, OTSurv, STEPH S2.

U1 = UNI; U2 = UNI2-h; - = no histology input; g. = genomics; h. = histology. NR = no separate source cohort.

Red bold = highest available value; underline = second. Overall only for rows reporting the same ten cohorts.

Year: original publication; TTA: first preprint 2025 (scores from 2026 v2). *MLP: cited textbook; SNNTrans: component year.

**DCT 2026 = current work year, not publication. DCT is a five-fold best-validation summary; source folds/SD in JSON.
