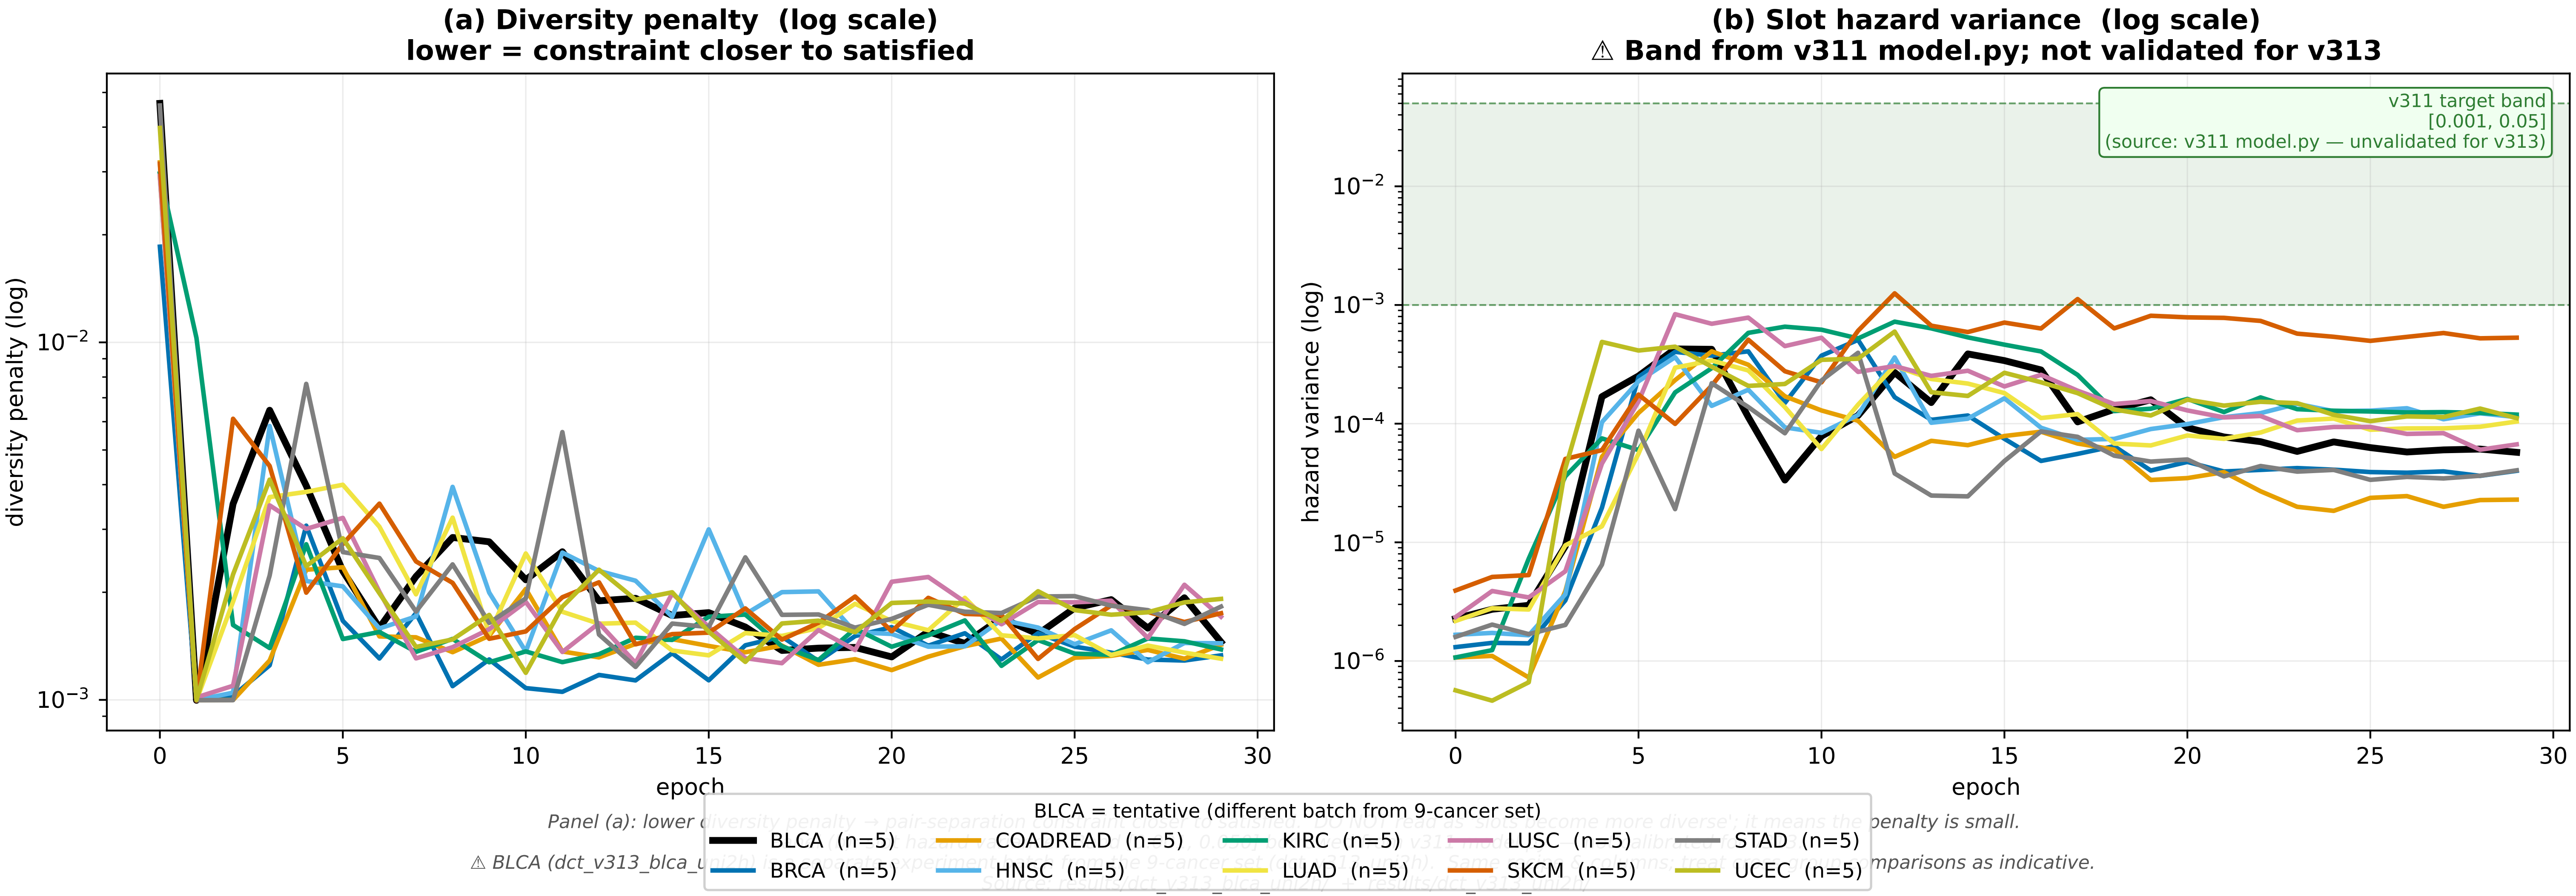
DCT v3.13: ten-cancer slot diversity training diagnostics (5-fold mean per study, seed 3, 30 epochs)
BLCA from dct_v313_blca_uni2h; 9-cancer from dct_v313_uni2h



Panel (a): lower diversity penalty → pair-separation constraint closer to satisfied. DO NOT read as 'slots become more diverse'; it means the penalty is small.

[illegible] hazard va[illegible], 0.050] band [illegible] v311 model.py — [illegible]calibrated for v313.

⚠ BLCA (dct_v313_blca_uni2h) is a separate experiment batch from the 9-cancer set (dct_v313_uni2h). Same recipe & columns; treat cross-group comparisons as indicative.
