

BLCA Efficiency Comparison: DCT v3.13 vs External Methods

Performance vs Memory

Performance vs Latency

DCT v3.13: measured on RTX 5090, batch=1, 2048 patches, 30 repeats, 5 warmup. Latency includes OT reconstruction (~493 ms).
External methods: measured with reference-like architectures, random init weights. External C-index: published values from original papers (not same-condition results). Memory: peak allocated GPU memory (MiB).
